3	Daso (Hai Phong) Joint Stock Company	Hai Phong	37.81	Real estate business, cosmetics business

The Company has the following dependent accounting units:

No.	Name of Unit	Place of incorporation and operation	Principal activities
1	Branch of Ha Noi Investment General Corporation –Hanic Real Estate Exchange	Hanoi	Real estate business
2	Branch of Ha Noi Investment General Corporation – Hanic 2 Labor export center	Bac Ninh	Labor export

2. ACCOUNTING CONVENTION AND ACCOUNTING PERIOD

2.1. Accounting convention

The accompanying consolidated financial statements, expressed in Vietnamese Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting.

The accompanying consolidated financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

2.2. Going concern assumption

There are no events that raise significant doubt about the going concern assumption, and the Company has neither the intention nor the obligation to cease operations or significantly downsize its business scale.

2.3. Financial year

The Company's financial year begins on 01 January and ends on 31 December.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIE

3.1 Estimate

The preparation of consolidated financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires The Board of Management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the financial year (reporting period). Although these accounting estimates are based on The Board of Management's best knowledge, actual results may differ from those estimates.

3.2 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and enterprises controlled by the Company (its subsidiaries) up to 31 December each year. Control is achieved where the Company has the power to govern the financial and operating policies of an investee enterprise so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated statement of income from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Company.

Intragroup transactions and balances are eliminated in full on consolidation.

Non-controlling interests consist of the amount of those non-controlling interests at the date of the original business combination (see below) and the non-controlling interests' share of changes in equity since the date of the combination. Losses in subsidiaries are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

3.3 Business combinations

On acquisition, the assets and liabilities and contingent liabilities of a subsidiary are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognised as goodwill. Any deficiency of the cost of acquisition below the fair values of the identifiable net assets acquired is credited to profit and loss in the period of acquisition.

The non-controlling interests are initially measured at the non-controlling shareholders' proportion of the net fair value of the assets, liabilities and contingent liabilities recognised.

3.4 Investments in associates

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting. Interests in associates are carried in the statement of financial position at cost as adjusted by post-acquisition changes in the Company's share of the net assets of the associate. Losses of an associate in excess of the Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Company's net investment in the associate) are not recognised.

Where a group entity transacts with an associate of the Company, unrealised profits and losses are eliminated to the extent of the Company's interest in the relevant associate.

3.5 Goodwill

Goodwill represents the excess of the cost of acquisition over the Company's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of a subsidiary, associate or jointly controlled entity at the date of acquisition. Goodwill is amortised on the straight-line basis over its estimated period of benefit of 10 years (per VAS 11 - Business Combination, the maximum estimated useful life should not exceed 10 years).

Goodwill arising on the acquisition of associates and jointly controlled entities is included in the carrying amount of the associates and jointly controlled entities. Goodwill arising on the acquisition of subsidiaries is presented separately as an asset in the consolidated statement of financial position.

On disposal of a subsidiary, associate or jointly controlled entity, the attributable amount of unamortised goodwill is included in the determination of the profit or loss on disposal.

3.6 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.7 Financial investments

Held-to-maturity investment

Held-to-maturity investments comprise investments that the Company has the positive intent or ability to hold to maturity, including term deposits (commercial bills), bonds, preference shares which the issuer shall redeem at a certain date in the future, loans held to maturity to earn periodic interest and other held-to-maturity investments.

Held-to-maturity investments are recognised on a trade date basis and are initially measured at acquisition price Total directly attributable transaction costs. Post-acquisition interest income from held-to-maturity investments is recognised in the statement of income on accrual basis. Pre-acquisition interest is deducted from the cost of such investments at the acquisition date.

Held-to-maturity investments are measured at cost less allowance for doubtful debts.

Allowance for doubtful debts relating to held-to-maturity investments is made in accordance with prevailing accounting regulations.

Loan receivables

Loan receivables are measured at cost less allowances for doubtful debts. Allowance for doubtful debts relating to loan receivables is made in accordance with prevailing accounting regulations.

Investments in associates

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

Investments in subsidiaries, joint ventures and associates are initially recognised at cost. The Company's share of the net profit of the investee after acquisition is recognised in the statement of income. Other distributions received other than such profit share are deducted from the cost of the investments as recoverable amounts.

Investments in subsidiaries, joint ventures and associates are carried in the Statement of Financial Position at cost less allowance for impairment of such investments (if any). Allowance for impairment of investments in subsidiaries, joint ventures and associates are made when there is reliable evidence for declining in value of these investments at the statement of financial position date.

Equity investments in other entities

Equity investments in other entities represent the Company's investments in ordinary shares of the entities over which the Company has no control, joint control, or significant influence.

Equity investments in other entities are carried at cost less allowance for impairment.

3.8 Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less allowance for doubtful debts.

Allowance for doubtful debts is made for each doubtful debt based on the age of the debt or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

3.9 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition.

Cost is calculated using the weighted average method and is accounted for using the perpetual inventory method.

Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

The evaluation of necessary allowance for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard

inventories and for those which have costs higher than net realisable values as at the statement of financial position date.

3.10 Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of acquired tangible fixed assets includes the purchase price and all directly attributable costs necessary to bring the asset to its intended use.

	Useful life (years)
Buildings and structures	10
Machinery and equipment	03 - 10
Transportation and transmission assets	06 - 10
Perennial trees	06

3.11 Construction in progress

Properties in the course of construction for production, rental or administrative purposes, or for other purposes, are carried at cost. Cost includes costs that are necessary to form the assets in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

3.12 Prepaid expenses

Prepaid expenses are expenses which have already been paid but relate to results of operations of multiple accounting periods. Prepaid expenses of the Company include the following expenses:

Tools and equipment

The tools and equipment have been put into use and are amortized to expense under the straight-line method to time allocation no more than 3 years.

Other expenses

Other expenses are allocated to expenses using the straight-line method with an allocation period of no more than 03 years.

3.13 Accounts payable and accrued expenses

Payables and accrued expenses are recognized as the amount of money to be paid in the future related to the goods and services received. Payable expenses are recognized based on a reasonable estimate of the payable.

Payables are classified as payable to suppliers, accrued expenses, and other payables according to the following principles:

- Payables to suppliers reflect the trade payables arising from commercial transactions between the Company and the seller, which is an independent entity of the Company.
- Accrued expenses represent amounts payable for goods and services received from suppliers or provided to customers but not yet paid due to the absence of invoices or insufficient supporting accounting documentation. They also include amounts payable to employees for accrued leave and other production and business expenses that need to be recognized in advance. When these expenses are incurred in reality, any differences between the actual amount and the accrued amount are adjusted accordingly by recognizing additional expenses or reversing previously accrued expenses to reflect the variance.

- Other payables reflect non-commercial receivables, not related to the purchase and sale transactions.

3.14 Borrowings and finance lease liabilities

Borrowings are tracked according to each object, each contract and the repayment term. In case of borrowings in foreign currency, detailed tracking is done in the original currency.

3.15 Borrowing costs

Borrowing costs are recognised in the statement of income in the year when incurred unless they are capitalised in accordance with Vietnamese Accounting Standard No. 16 "Borrowing costs". Accordingly, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. For specific borrowings for the purpose of construction of fixed assets and investment properties, borrowing costs are capitalised even when the construction period is under 12 months.

3.16 Owner's equity

Capital is recorded according to the amount actually invested by shareholders.

3.17 Distribution of net profits

Profit after tax is distributed to shareholders after an appropriation of funds under the Charter of the Company as same as the law and is approved by the General Meeting of Shareholders.

The distribution of profits to shareholders is considered to non-cash items in undistributed profit may affect cash flow and ability to pay dividends as profit from revaluation of assets contributed as capital, interest due to the revaluation of monetary items, the financial instruments and other non-cash items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders and there is a list of shareholders entitled to receive dividends.

3.18 Revenue and earnings

Revenue from sales of finished goods and merchandise goods

Revenue from sales of finished goods and merchandise goods is recorded when simultaneously satisfy the following conditions:

- The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from service rendered

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognised in each period by reference to the percentage of completion of the transaction at the statement of financial position date of that period. The outcome of a transaction can be measured reliably when all following conditions are satisfied:

- The amount of revenue can be measured reliably.
- It is probable that the economic benefits associated with the transaction will flow to the Company.
- The percentage of completion of the transaction at the statement of financial position date can be measured reliably; and.
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Financial income

Interest

Interest is recognized on an accrual basis, are determined on the balance of cash in bank and the actual interest rate for each period.

Dividends and profits received

Dividends and profit shared are recognized when the Company receive the notice of dividends or profit from the capital contribution. Dividends which received by shares, only follow up the number of shares increases, no recognition of the value of shares.

3.19 General and administration expenses

General and administration expenses reflect actual expenses incurred during the general management of the Company, mainly including expenses for labour of management department salaries; social insurance, health insurance, trade union fees, unemployment insurance for labour; office equipment expenses; depreciation and amortisation; provision expenses; outside services and other expenses.

3.20 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the Income Statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are not taxable or deductible.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The Company's income tax determination is based on the current tax regulations. However, these regulations are subject to change from time to time and the ultimate determination of corporate income tax depends on the results of the tax authorities' examination.

3.21 Related parties

The parties are considered to be related if that party has the ability to control or significantly influence the other party in making decisions on financial policies and operations. Parties are considered a related party of the Company in case that party is able to control the company or to cause material effects on the financial decisions.

In considering the relationship of the parties involved, the nature of the relationship is more emphasized than the legal form of the relationship.

The determination of corporate income tax payable by the Company is based on current tax regulations. However, these regulations change from time to time or other objective reasons, and the tax regulations for various types of transactions can be interpreted in different ways. Therefore, the tax amount presented on the financial statements may change when the tax authority inspects.

4.17 Short-term provisions

The Company is recognizing a provision arising from the early liquidation of Service Contract No. 16/03-09/HDDV-2020/PT signed on 3 September 2020, between Ha Noi Investment General Corporation and Thien Phu Thanh International Joint Stock Company regarding the leasing of warehouses for the storage and loading coal and providing related port services, with the amount of VND 8,269,327,092. Currently, both parties are in the negotiation process to agree on the compensation amount related to the early liquidation of this contract.
